

THE ROLE OF FAITH COMMUNITIES IN SUPPORTING PROGRAMMES FOR CHILDREN, ADOLESCENTS AND YOUNG MEN LIVING WITH AND AFFECTED BY HIV: A QUALITATIVE ANALYSIS OF PROMISING INTERVENTIONS IN SUB-SAHARAN AFRICA

**Thursday 9 December 2021
15:27 - 16:12 SAST**

In 2020 and 2021, the UNAIDS – PEPFAR Faith Initiative undertook a qualitative study which identified 42 interventions in several areas of programming implemented by faith communities that are “promising practices” to ensure greater access to HIV services to children and adolescents, increase their linkage to treatment and care, retention and viral load suppression. This session will present the most successful FBOs interventions for greater health outcomes among children.

FACILITATOR

REV. JANE NG'ANG'A | INERELA+ Kenya

SPEAKERS

GIBSTAR MAKANGILA

Community Outreach by Faith Community Groups: Faith engaged Community Outreach Posts, Zambia
